

ZOFIA

The Next Generation DeFi Token on Ethereum

Whitepaper - Version 1.0

September 2026

1. Introduction

ZOFIA (Zooqofficial) is a next-generation decentralized finance (DeFi) token built on the **Ethereum blockchain**. It is designed to provide a transparent, sustainable, and community-driven ecosystem that rewards long-term holders and empowers participants through on-chain governance.

ZOFIA stands as a beacon of true decentralization. Our mission is to create a token that serves not only as a medium of exchange but also as a tool for collective decision-making and value creation.

2. Vision & Mission

Vision: To become the most trusted and transparent DeFi token on Ethereum, where the community holds the real power to shape the future of the protocol.

Mission: To provide a robust, secure, and user-friendly decentralized financial infrastructure that enables individuals to take control of their financial assets, earn passive income, and participate in the governance of the ecosystem.

3. Core Features

- **Staking Rewards:** Earn passive income by staking ZOFIA tokens.
- **On-Chain Governance:** Real voting power for holders.
- **Deflationary Burn:** 2% burn per transaction.
- **Cross-Chain Bridge:** Transfers between Ethereum, Avalanche, and BOT Chain.
- **Upgradeable Contract:** UUPS proxy pattern for future enhancements.
- **Renounced Ownership:** No central authority can mint new tokens.
- **3-Year Locked Liquidity:** Investor protection.
